BASE TEMPLATE ENHANCEMENTS

Ringing In The New Year With Some Base
Template Editions!

Recurring Toggle

Set giving content to have a recurring toggle. We made it easy to configure, so you can make it easy to checkout for your donors.

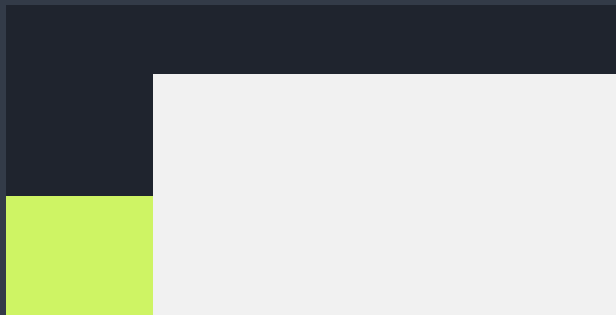

Angled Views

Apply one of the angled view classes to create an angled background, which makes for a seamless transition between your content.

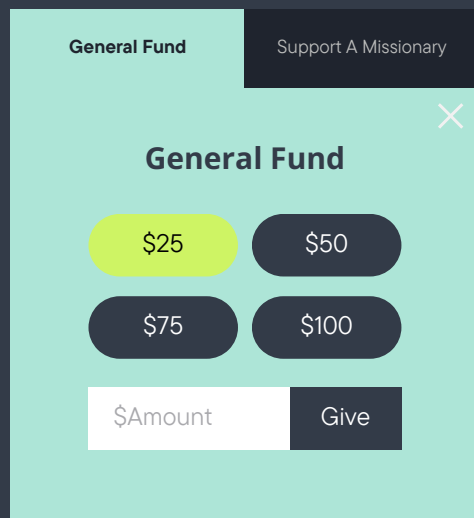

Offset/Overlapping Views

Stick your content inside an offset container and apply overlapping views to create a dynamic looking layout.

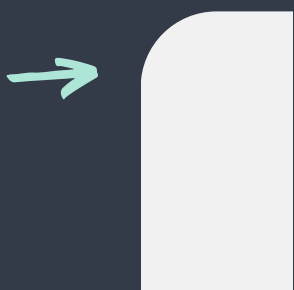

Giving Popup

A highly requested feature that allows you to create a popup that will open upon clicking a header menu item. This giving popup allows you to create tabs that will present multiple kinds of giving content.

Rounded Corners

Publish containers with rounded corners by applying this view class to your basic wrapper.

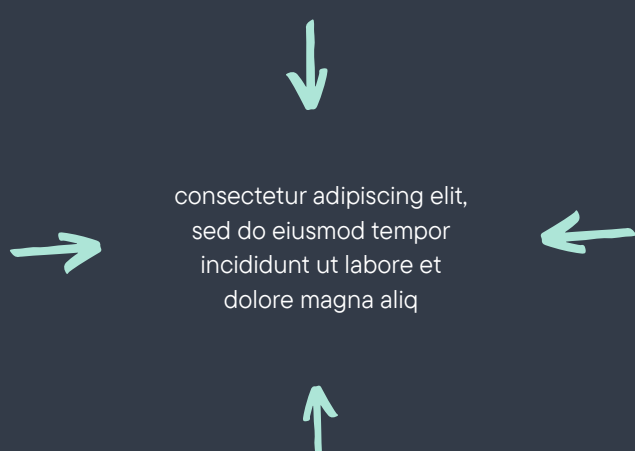

Flexing

Align all of your content horizontally or vertically using one basic wrapper.

Special Padding

A selection of new padding options that allow you to get more specific with your spacing.

Shadows

Add a drop shadow to a wrapper to create more depth in your designs.

We Fixed A Few Bugs Along The Way:

- Cleaned up text wrapping for filters on world map module
- Cleaned up social media icons
- Equalized height by default for all content in search modules
